Note:

A component power supply with load will be installed into final equipment which consists of an electronically shielded metal enclosure. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Regulations on the complete installation again.

 $<\!\!5\%\ residual\ voltage\ for\ 0.5\ cycles\ , <\!\!5\%\ residual\ voltage\ for\ 250\ cycles\ residual\ voltage\ for\ 250\ cycles\ residual\ residual\ residual\ r$ 

The EMC tests mentioned above are performed using a well defined metal plate to simulate said metal enclosure.

For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies".(as available on <a href="http://www.meanwell.com">http://www.meanwell.com</a>)" and TDF (Technical Documentation File).
